

Here are calibration parameters from yml file:

```
%YAML:1.0
```

```
---
```

```
image_width: 640
```

```
image_height: 480
```

```
camera_matrix: !!opencv-matrix
```

```
  rows: 3
```

```
  cols: 3
```

```
  dt: d
```

```
  data: [ 667.84506611591553, 0., 307.9167202969636, 0.,  
         669.27493630630534, 256.16540762411159, 0., 0., 1. ]
```

```
distortion_coefficients: !!opencv-matrix
```

```
  rows: 1
```

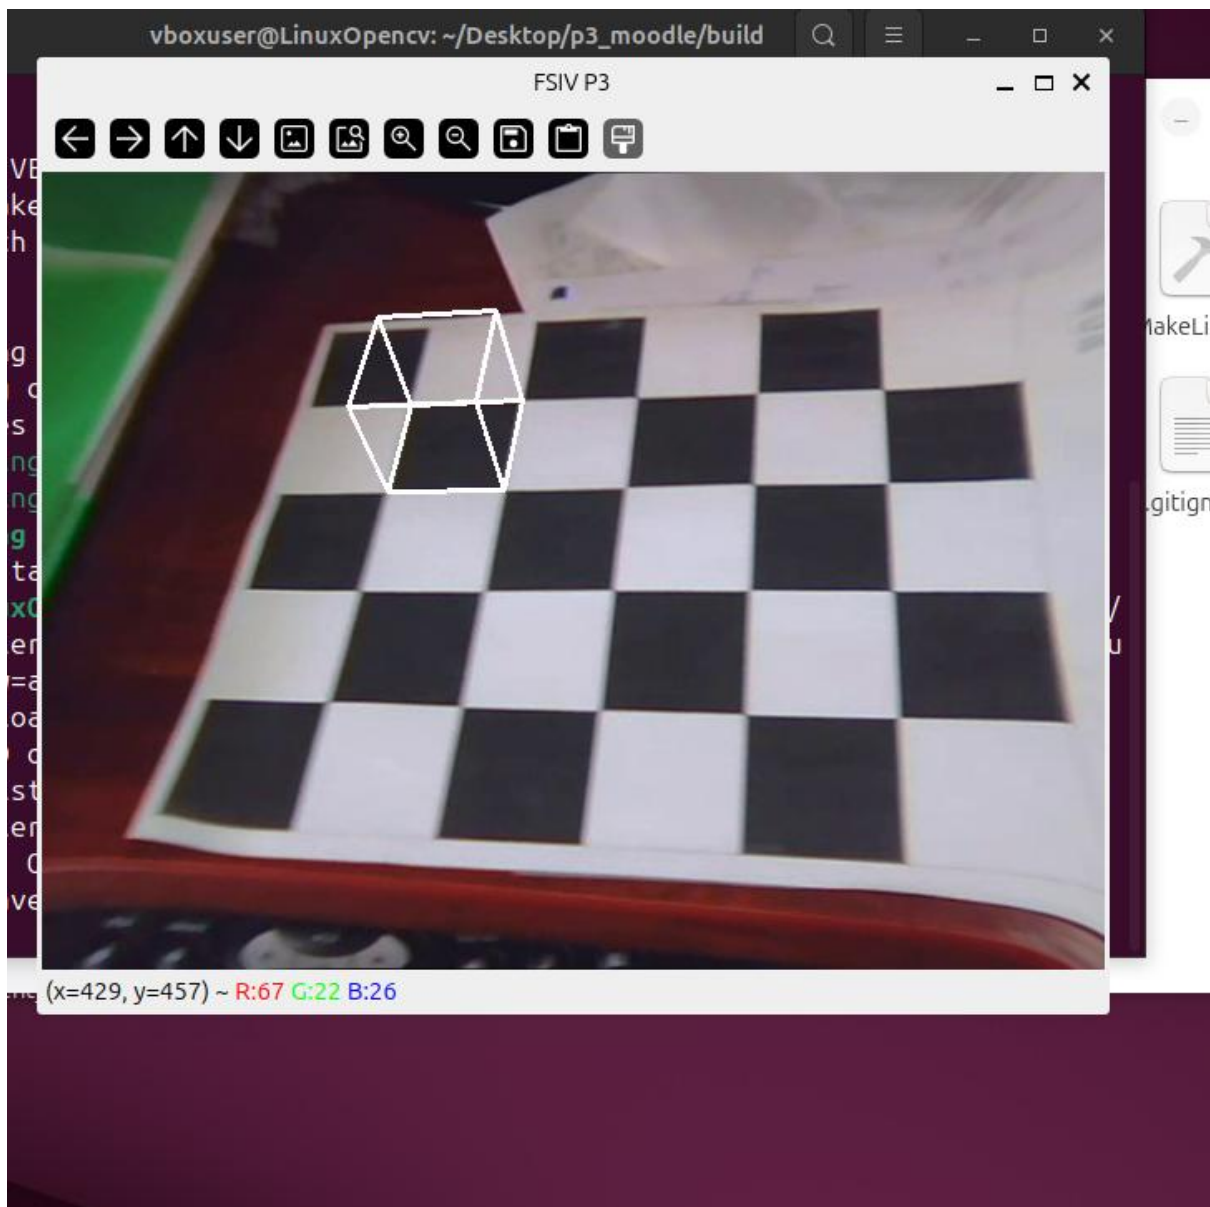

```
  cols: 5
```

```
  dt: d
```

```
  data: [ -0.057824043221257782, 1.4531833645628631,  
         -0.00062547032040394495, -0.0052954204915419264,  
         -6.5167438243424503 ]
```

```
error: 0.54134655506760376
```

and here are screenshots from different angles:
